General Notes

This is my interpretation of how the Common Speech might be and sound, based on references scattered throughout the books (and to some extent the games). It's a personal project I've been wanting to tackle for a while.

If you enjoy this, I encourage you to expand on the article! Feel free to credit yourself as a contributor.

Disclaimer

This construction of the language is not affiliated with any of The Witcher Fanon Wikia projects, such as "[Tales of the World of The Witcher](#)" or the "[Extended Ancient Pantheon](#)." However, I will add a lot of derivative words with it's origins that could work for the [dwarvish language](#) or gnomish language or example.

Real world origins

To differentiate Common Speech from other languages like [Elder Speech](#), a base rooted in Romance languages has been used (in contrast to Elder Speech, which draws heavily from Celtic languages, and Dwarvish, which draws from Germanic languages). The main foundation is the Lingua Franca Nova or Elefen (due to its simplicity and flexibility in creating a natural language, along with lore reasons that extend beyond contrast with Elvish). Additionally, adapted words from other

languages are incorporated, primarily Romance languages.

Pronunciation

Consonants

Consonant	Pronunciation in Common Speech
b	[b]
c	[k]
č	[tʃ] (ch as in "church")
ć	[tɕ]
d	[d]
f	[f]
g	[g]
h	[h]
j	[j]
k	[k]
l	[l]
ł	[ɬ] (Similar to Navajo, it is used for the voiceless lateral alveolar fricative, and like Ll in Welsh)
m	[m]
n	[n]
ń	[ɲ] (as in "song")

ň	[ɲ]
ñ	[ɲ] (similar to Spanish "ñ")
ŋ	[ŋ] (For sounds like "ng" in English "sing", useful for words with nasal endings)
p	[p]
rí	[r] (rolled "r")
s	[s]
ś	[ɕ]
ș	[ʃ] (sh as in "she")
š	[ʃ] (sh as in "she")
t	[t]
ṭ	[tʂ]
v	[v]
z	[z]
ž	[ʒ] (zh as in "measure")
ź	[ʐ]
cz	[tʂ]
rz	[ʒ]
kh	[x] (as in German "Bach")
ts	[ts]

ch	[ʒ] (zh as in "measure")
sh	[ʃ] (sh as in "she")
shch	[ʃtʃ] (shch as in "fresh cheese")

nt	/nt/	like 'nt' in "ant"	ant, kant
lk	/lk/	like 'lk' in "milk"	milk, folk
rd	/rd/	like 'rd' in "hard"	hard, fārd

Grammar of Common Tongue

Word Order

- The common word order is **Subject-Verb-Object(SVO)** - This aligns with the word order observed in the provided phrases ("**En face**" - preposition-noun, "**Nostra duchessa**" - adjective-noun). However, there are exceptions like "**Le Skellige Inisi**" (the Skellige Islands) or **Vengerberg** (the city of Venger) to name a few, where the name itself comes first. This serves to emphasize or clarify the specific location being referred to. For example "**Le Skellige Inisi**" highlights the Skellige Islands as a distinct entity, separate from other island chains.

Noun Gender

- Nouns have gender distinctions, such as masculine (e.g., **calvo**), feminine (e.g., **abandonada**), and neutral (e.g., **monstrum**) - This is consistent with

Romance languages (from which Common Speech borrows heavily) that typically have grammatical genders.

Verbs

- Infinitive verbs end in various ways, like *-ar* (e.g., **abakoriar**) and *-en* (e.g., **administracen**). - Verb conjugations follow patterns similar to Romance languages, where infinitive verbs have different endings depending on the verb group.

Negation

- Negation is achieved through the use of a negation particle placed before the verb, similar to Romance languages like French (**ne...pas**) or Spanish (**no**). For example: **Eu non canto** (I do not sing) or **Nici eu canto** (I do not sing either)

Pluralization

Pluralization is achieved through adding a suffix to the noun stem, similar to Romance languages. The specific suffix might vary depending on the noun's gender and declension class.

Adjectives:

- Adjectives agree with the gender of the noun they modify (e.g., **bianco** for masculine and **abandonada** for feminine) - This aligns with the behavior of adjectives in Romance languages.

Pronouns

- Pronouns include nominative and accusative forms for each person (singular and plural) and possessive pronouns.
- **Nominative pronouns:** *These are used as the subjects of sentences.*
 - eu (I)
 - ti (you)
 - nós (we)
 - vós (you all)

- eles (they)
- **Accusative pronouns:** *These are used as the objects of verbs or prepositions.*
 - mi (me)
 - ti (you)
 - nós (us)
 - vós (you all)
 - eles (them)
- **Possessive pronouns:** *These indicate possession or ownership.*
 - mi / miu (my)
 - ti / tiu (your)
 - nostro (our)
 - vostro (your)
 - seu (their)

Possessive Forms

- Possessive forms are be constructed using possessive pronouns or by adding a possessive suffix to the noun (similar to some Romance languages).

Numbers

- Numbers follow a base-10 system with separate words for numerals one to ten, and morphemes to create higher numbers (tens, hundreds, etc.).

Syntax

- **Interrogative sentences:** Questions in the Nordling Common Speech are often formed by inverting the subject and the verb, or by using question words.
- **Conditional sentences:** These often use the subjunctive mood and conditional verb forms to express hypothetical situations or conditions.

Imperatives

- Imperatives in the Nordling Common Speech are used to give commands or instructions. They typically use the infinitive form of the verb without a

subject.

Phonological and Orthographic Rules for Apostrophes (Comes)

Separation of Composed Words

- Apostrophes are used to join two or more words into a single, composed term. This can create compound nouns and adjectives. However, this rule is not always present, as exceptions exist if the terms used to create the new word are simple such in the case for example of herbasano (herbalist) combining the words herba (herb) with sano (healthy).

Example

- "Pêl'rossa" (redhead) combines "pêl" (hair) and "rossa" (red).
- "bu ´rac" (dumbass) joins "bu" (fool) and "rac" (idiot).

Superlative Formation

- Apostrophes indicate superlatives by combining the base adjective with a superlative suffix or marker.

Example

- "Naus ´t" (highest) from "Naus" (high).

Phrases and Emphasis

- In sentences, apostrophes can separate significant parts or indicate a pause for emphasis or stylistic reasons.

Example

- *"Porjmi miu espase, eu zatero Sqnzi Lowni, la Naus't Bæha, Lionera za Cintra!"* (By my sword, I swear Blood Oath, the Highest Queen, Lioness of Cintra!)

Integrating Apostrophes into the Grammar

Word Formation with Apostrophes

Composed Words

- **Structure:** [Base Word]'[Combined Word]

Example

- "Pêl'rossa" (redhead) = "pêl" (hair) + "rossa" (red)
- "bur'rac" (dumbass) = "bur" (fool) + "rac" (idiot)

Superlatives

- **Structure:** [Adjective]'[Superlative Marker]

Example

- "Naus't" (highest) = "naus" (high) + "t" (superlative marker)

Sentence Structure and Apostrophes

Emphasis and Pauses

- Apostrophes can be used within sentences to create natural pauses or to emphasize particular segments.

Example

- "Porjmi miu espase, eu zatero Sɔnzi Lowni, la Naus't Bæha, Lionera za Cintra!"

Diphthongs

Diphthong	IPA Symbol	Pronunciation Guide
ai	[aɪ]	like 'ai' in "aisle"
au	[aʊ]	like 'ow' in "cow"
ei	[eɪ]	like 'ay' in "say"
eu	[ɛu]	blend of [ɛ] and [u]
oi	[ɔɪ]	like 'oy' in "boy"
ou	[oʊ]	like 'o' in "go"
iu	[ju]	like 'yu' in "you"
ie	[iɛ]	blend of [i] and [ɛ]

ua	[wa]	like 'wa' in "water"
ue	[we]	like 'ue' in "cue"

Prosody

Stress

- Primary stress typically falls on the penultimate (second-to-last) syllable of a word.
- In compound words and words with apostrophes, primary stress falls on the first part of the compound or the segment preceding the apostrophe.

Example

- "Pêl'rossa" (redhead) - Stress on "Pêl"; "Naus't" (highest) - Stress on "Naus".

Intonation

- Declarative sentences generally have a falling intonation.
- Interrogative sentences have a rising intonation.
- Imperatives have a high pitch on the first syllable, followed by a falling intonation.

Phonotactics

Syllable Structure

- The basic syllable structure is (C)V(C), where C represents a consonant and V represents a vowel.
- Clusters of up to two consonants are allowed at the beginning and end of syllables.

Onset Clusters

- Common onset clusters include: bl, tr, sp, sk, fl, gl.

Medial Clusters

- Clusters within words include: nd, mp, st.

Final Clusters

- Final clusters include: nt, lk, rd.

Apostrophes

- Apostrophes are used to separate segments in compound words and for superlatives.
- They do not affect the allowable combinations of sounds directly but guide the stress and pronunciation.
- Example: "Pêl'rossa" (redhead) and "Naus't" (highest).

Examples of Usage

- Simple Word: "bā"
 - Structure: CV
- Compound Word: "Pêl'rossa" (redhead)
 - Structure: CVC'CVC
- **Sentence:** "Porjmi miu espase, eu zatero Sønzi Lowni, la Naus't Bæha, Lionera za Cintra!"
 - Structure: Pronoun-Verb-Object, with commas indicating pauses and emphasis.

Naming convention

In the Nordling Common Tongue, the naming convention for a person follows the structure of a name followed by one surname, typically inherited from the father (in orphan's cases, the place where one was raised or was from, was used as a surname, example: Geralt of Rivia) This differs from some [Far Eastern](#) cultures where the surname precedes the name. Double surnames, common prior to the 14th century in the Nordling Common Tongue, were usually reserved for the aristocracy or the bourgeois class, as seen in Margarita Laux-Antille for example. It was in the late 14th and early 15th centuries that this changed and became more common. Women, upon marriage, retained their first surname but adopted their husband's surname as a patronymic, placing it after their own. The same practice could be observed with men if they so chose, as exemplified by names like [Jolanta Dinmarb Pitch](#) and [Putnam Pitch Dinmarb](#).

Proto - Common Tongue

Based on the letters^[2] in the book "Season of Storms," as well as the juridic terms that Geralt uses during his trial^[3], it is probable that a Proto-Common Tongue resembles, to a certain degree, something like Latin^[4], with the first Nordling languages being similar to tongues like the Faliscan, Siculian, and Venetic languages. These eventually merged and created the Proto-Common Tongue that eventually evolved into the Common Tongue we know today. This would explain the use of these terms as a form of high speech within the world of The Witcher. Similar to how Latin persisted in legal and religious contexts long after the rise of Romance languages, the survival of the Proto-Common Tongue could have served a similar function for the Nordlings. This could explain Geralt's familiarity with the juridic terms.

This point further strengthens with the mention in the lore of the next *"Based on the languages of the various groups of colonists and nonhumans, Nordlings developed their own tongue, called the Common Speech or Common Tongue."* A personal theory / headcanon of mine is that the Common Tongue was created as something like "English in reverse." Instead of the invaders (in this case, the Nordlings) having a Germanic Language that absorbed many Latin terms (since the dwarfs are the ones with a Germanic-based language), and fused with Norse and Celtic languages (in this case, Elder Speech), they would have various languages that would eventually give rise to the "Latin-like" Proto-Common, which would eventually absorb terms from other human groups already present such as the Wozgor, Dauk, Markee and non-humans (dwarves, elves, etc...) and "vulgarize". This would explain the presence of terms from different languages that at first glance don't seem to fit in the same language, such as "berg" for the naming of some cities, "von" for the naming of some persons (such as Olgierd von Everec), and "Tretogor" (which means "Three Hills" in Common Slavic) to name a few.

Differences with Romance languages

Since Common Speech is essentially a creole language, it exhibits certain distinct characteristics that set it apart from pure Romance languages. Its grammatical structure is primarily Romance^[5] but with notable deviations and influences from other linguistic families.

One prominent feature is its extensive borrowing from various language groups, including Germanic and Slavic. Additionally, while the basic grammar follows Romance language patterns, such as noun gender and verb conjugation, there are nuances that diverge from traditional Romance grammar rules. As seen in examples such as *"Le Skellige Inisi,"* instead of *"Le inisi ze Skellige / Le inisei Skellige"* (which would be the classical structure in Romance languages like Spanish *"Las Islas Skellige,"* Italian *"Le isole Skellige,"* and French *"Les îles Skellige"*) and *"Nici eu canto"* (I do not sing, which in pure Romance languages like Spanish it would be *"yo tampoco canto,"* and even in Germanic languages like English *"I do not sing either"*)

Common Speech, like many creole languages, favor simpler grammatical structures for everyday communication. This explain the lack of double articles ("Le" + "ze") in *"Le Skellige Inisi"* instead of the already mentioned *"Le inisi ze Skellige"* (the Islands of Skellige) or the use of *é* instead of *jesé* in informal communication as seen in *"Mi néve é"* (my name is) instead of using the verb *jesar* (to be) and it ´s conjugation *jesé*.

Another key difference is how plurals are made, instead of adding an -s to a word to make it plural, as seen in the example of *espadas* in Spanish (Romance language) or *swords* in English (Germanic language), an -i is added. For example, *espasa* (sword) would be *espasai* (swords). The only exception to this rule is the conjugation of some verbs.

In-World History

Main article: Nordling

When Nordlings arrived in what is now known as the Northern Kingdoms, they brought with them a diverse array of languages, each originating from the smaller but various groups that participated in the Landing of the Exiles in the 760s. These groups, after settling, not only interacted with their own people but also interacted and sometimes clashed with the indigenous humans of the region, such as the Dauk, Wozgor, Markee, Migwesk, and others, as well as non-human races already present there, such as the Aen Seidhe [elves](#), [dwarves](#), vrans, and many more. Over time, out of necessity and mutual influence, the Nordlings developed their own common tongue, a creole language that would be known as the Common Speech or Common Tongue.

Writing System

Originally, the Common Tongue was written in First Runes, the first human alphabet in the Northern Kingdoms, based on elven runes and dwarven ideograms. However, as the Common Tongue evolved into its modern version, another alphabet was created—the so-called Modern Alphabet—which, some scholars and mages theorize, that was developed using a mix of the First Runes, Dauk and Migwesk alphabets.

Writing System of Common Tongue in the Real World

The Common Tongue uses the modern alphabet, which is based on the real-world Slavic Glagolitic alphabet. The main difference is that it incorporates not only the sounds of the consonants and vowels of this alphabet but also adds new ones such as ä, ë, î, and ū, for example.

This is one of the reasons why Lingua Franca Nova was used as a skeleton for the language, since the Witcher books are filled with many Latin terms, such as Monstrum, Post Scriptum, etc. And Lingua Franca Nova is the only known Latin language known for using something similar—the Cyrillic alphabet.

Common Tongue Evolution Example

Feature	Proto-Common Tongue	Old Common Tongue	Common Tongue
Sentence	In dubio pro reo	Bin debi pro kozei	En debio pre kosiwe
Meaning	When in doubt, favor for the accused	When in doubt, favor for the accused / in favor of the prisoner	When in doubt, favor for the accused / in favor of the prisoner

Common Speech comparison with the Older Tongues

--	--

Language	Phrase (Translation)
Common Speech (Romance based) (creole)	Ti jesé mi amice, èlf. (You are my friend, elf.)
Elder Speech (Celtic based)	T'en me caraid, coblyn. (You are my friend, elf.)
Gnomish (Albanic based)	Ti je miku im, kukudh. (You are my friend, elf.)
Dwarvish (Germanic based)	Du beist mäi frënd, elf. (You are my friend, elf.)

Comparison between Common Speech and Elder Speech derived dialects/ languages

Feature	English	Skellige Jargon	Zerrikani Dialect	Silk Islander Dialect	Common Tongue
Sentence	By my sword, I swear Blood Oath, the Highest Queen, Lioness of Cintra!	Aen me Glaeddyv, zvaere a'Bloedgeas, Ard Rhena, Lionors Aep Xintra!	Aen me sayf, saverre a'Bloeddega Kha'daj rayni, Libua a'Xintra!	Aena mei'ka pahika, sabeirra e'aelike koko Ardma Moiwa, Lioma o Ximtra!	Porjmi miu espase, eu zatero Sønzi Lowni, la Naus't Bæha, Lionera za Cintra!

Dictionary

Common Speech	English
---------------	---------

æc	<i>Also (from Old English, æc)</i>
Ænill	<i>Ring (from Þrjótrunn, ænill)</i>
Arc	<i>Bow or arch, depending on the context</i>
Ainc	<i>Rather (from Old French, ainc)</i>
À	<i>at (from French, À)</i>
āfordo (a)	<i>Lord / Lady (from Old English, hlāford)</i>
Abante	<i>Ally (from Drow, abban)</i>
abandonada (o)	<i>abandoned</i>
abakoriar	<i>to harass, corner, subdue, subject, both physically and morally (from Canarian Spanish, abacorar)</i>
abala	<i>grandmother (from Vandalic, abala)</i>
Abarrir	<i>To destroy or exterminate (from Medieval Spanish, abarrir)</i>
abur	<i>steam, vapour (from Romanian, abur)</i>
aburcar	<i>to climb up (from Romanian, aburca)</i>
arbe ´kar	<i>to produce something (from Iberian, arbecar)</i>
academia	<i>academy</i>
acoplador	<i>Leather belt to hold trousers in place (from Aragonese Spanish, acoplador)</i>
acrilica	<i>acrylic</i>
	<i>badly or well groomed, usually badly; badly arranged,</i>

Acotraciado	<i>badly dressed, badly arranged a thing</i> (from Aragonese, <i>Acotraciáu</i>)
Acorro	<i>Relief, aid, protection, assistance, help</i> (from Medieval Spanish, <i>acorro</i>)
Acopilar	To gather a lot from a thing, not to be confused with the verb "to compile" (from Old Spanish, <i>acopilar</i>)
Achel	<i>Water</i> (from Thracian, <i>achel</i>)
Adast	Until, to, as far as (it marks the end of an action, a final number, a limit of a place or the end of time) (from Aingeljă, <i>Adast</i>)
Adepar	To give water to an animal (from Romanian, <i>adăpa</i>)
adevăr	<i>truth</i> (from Romanian, <i>adevăr</i>)
Adewpó	Shelter (From Romanian, <i>adăpost</i>)
Adelinar	<i>To walk, to go somewhere</i> (from Medieval Spanish, <i>adelinar</i>)
Ademenir	To attract, to seduce (from Romanian, <i>ademeni</i>)
Adobes	<i>To be arranged, to be prepared</i> (from Medieval Spanish, <i>adobes</i>)
Adekumär	To adapt, to tailor (from Aingeljă, <i>adecujăre</i>)
Adu	Law (from Proto-Celtic, <i>adu</i>)
Abeș	<i>really, for sure!</i> (from Romanian, <i>Abeș</i>)
Aedi	<i>Shard, piece</i> (from Elder Speech, <i>Aedd</i>)
Agă	Cow (from Proto-Celtic, <i>agos</i>)

Ago	Bull
Agale	Slowly, step by step (from Aromanian, agale)
Ahul	Weak (from Basque, ahul)
Agu'wia	Needle (from Romanova, agu'ia)
Allaty	Always (from Bulgarian, Alati)
algũus	Some (from Medieval Spanish, <i>algũus</i>)
Alkātar	To put together (from Romanian, alcătuï)
Âlde	A indefinite article meaning ‘of the kind of, people such as’ (from Romanian, alde)
asorbe	absorption
asetable	acceptable
aria	<i>air</i> (From Corsican, Italian, and Sardinian, <i>aria</i>)
Ariàn	Headache or discomfort caused by a draft (from Canarian Spanish, Airón)
Alendar	<i>To breath</i> (from Asturian, <i>alendar</i>)
Alminsk	Mole (from Abenaki, alm8nska) (Hengforsian and Kovirian dialect)
Argilo (a)	<i>Mouse</i> (from Thracian, <i>Argilos</i>)
Alkêmtan	breasts, especially a woman's breasts (from Faerunian Common Tongue, alpetan)
Amarillo	Yellow (from Spanish, Amarillo)
Amben	Butter (from Proto-Celtic, amben)

Ame'noce	Unless (from Romanova, ame'noce)

Wika	<i>Witch</i> (From English, <i>Wicca</i>)
xenio (a)	foreign, exotic

Xekô	Dry (from Elbic, xecco)
Y	and (from Various Romance Languages, y)
Yadrar	To steal
Yadrę	Thief (from Valencian, Lladre)
Yeri	Yesterday (from Romanian, Ieri)
Yaé	Milk (from Brithenig, Ilaeth)
za (o) (e)	<i>of/ from</i> (from Polish, z)
Za'kulo	Spell (from Polish, Zakłęcie and Common Tongue, Koulo)
Zakulur	To recite a spell (from Common Tongue, Za'kulo)
Ze'le (a) (i)	Of him / of her / of it (Common Tongue ze [of] + ele/ela/eli (him/her/it, accusative pronouns)
Zaterar	To swear/ to promise (from Polish, Zastaw)
Zaré	<i>Glow</i> (from Czech, záře)
zerèō	<i>zero</i> (from Spanègizze, zerèō)
že ´tea	<i>Wife</i> (from Common Slavic, ženà)
Zōgendo	Handsome (referring to a man, or a male animal) (from Macedonian, Згоден, Zgoden)
zuraw	<i>crane</i> (from Polish, Żuraw)
Zulafin	Tuna fish (from Faerunian Common Tongue, bluefin)

Names

Common Speech	English
Aldersberg	City of Alders
Corvo Bianco ^[11]	White Crow
Elskerdeg	The Love Mountain Pass
Geralt za Rivia	Geralt of Rivia
Inis Porhoet ^[12]	The island beyond the forest
Inis Vitre ^[13]	Island of Glass
Mons Calvus / Montecalvo ^[14]	Bald Peak / Bald Mountain
Novigrad	New city
Nimue verch Wledyr ap Gwyn	Nimue daughter of Wledyr and daughter of Gwyn
Olgierd von Everec	Olgierd descendant of Everec
Peixe de Mar	Sea Fish
Sorensen	Name derive from Sønze de Sorrëm / Søn del Sorrëm / Søn derëm / Soremsen / Sorensen (<i>son of the blacksmith</i>)
Toussaint ^[15]	All Saints
Tretogor	Three Hills
Vatburg ^[16]	Vigilance Castle

Vengerberg

City of Venger

Phrases

Common Speech	English
¡Acum iu nici!	Now or never!
Adu Syndod	Law of Surprise
¡Bon di!	Good day! / Good morning!
En face ^[17]	In front of
Eu non canto	I do not sing
¡É um treaba pro Vesemir! (informal)/ ¡Jés um treaba pro Vesemir! (formal)	It is a job for Vesemir!
Gaude, mater Redania, prole fæcunda nobili... ^[18]	Rejoice, oh Mother Redania. Rich in noble offspring...
¿Howot jesai ti? ¿Totus bom?	How are you?, Everything good?
Íá, isto é um inwid, ¿Ti non wiei seu zaré? (jés for formal)	Yeah, this is a fraud, don't you see it's glow?
¡Isto é um maegen pro totus! (jés for formal)	This is a virtuous action for everyone!
Ista é landa zo kolosoi, meu āfordo.	This is a land of gigants, my lord.
Jesa mai manerai na kurrar a nixa, kurtes'tala, bærnala, inkú a pauc vechi mar'wika za'kuloi il darbán...	There a several ways to kill a nixa, behead her, burned her, even a few old Sea Witch spells will do...

Mi néve é / Mi néve jés (informal/formal)	My name is
¡Monstrum na kurrar monstrum!	Monsters to kill monsters!
Nostra duchessa ^[19]	Our duchess
Nós setamoi isto en la modula manera. Espasei. Acum.	We settle it in the old way. Swords. Now.
Nós névei jesei	Our names are
Ti jesai um vedžmin, æc um litsaro.	you are a witcher, also a knight.
Ti jesei ze le nobili, prinkisa.	You are from the nobility, princess.
¿Ti ap Marka?	Are you Marka's daughter?
¿Ud é isto? (jés for formal)	Where is this?
¿É ti um vedžmin za Scoal za Zuraw? (jés for formal)	Are you a witcher from the School of the Crane?
¿É ti um vedžmin za Scoal ze Pistic? (jés for formal)	Are you a witcher from the School of the Cat?
¿É ti ze Toussaint? (jés for formal)	Are you from Toussaint?
Jakeń ti non resimei, ti non jesamak bom	If you don't repeat, you will never be good
Le bore ze um di'clari in mińi'bærne é bonik, ¿Nõn veruvei?	The morning of a bright/ clear day in winter is beautiful, don't you think?
Ze'la idea	Her idea

Accents

Some description of the different accents as well examples, are the following:

Standard Aedirnian

The Standard Aedirnian accent is known for its guttural pronunciation, placing emphasis on consonant sounds. Vowels are typically shortened, and diphthongs frequently collapse into single vowel sounds. Consonants such as "k" and "g" are pronounced deeper in the throat, resulting in a harsher sound. The Standard Aedirnian dialect incorporates more consonant clusters than other Common Speech variations, contributing to a denser overall sound. Unstressed vowels are commonly abbreviated or even omitted, especially at the end of words.

Standard Cidarian

Unlike the standard Aedirnian focus on consonants, Cidarian speakers tend to lengthen and emphasize vowels, creating a more lyrical and flowing quality to their speech. This emphasis can also influence the pronunciation of certain consonants, particularly those preceding stressed vowels. The accent is known for its distinctive rhythm, characterized by a moderate pace and evenly spaced syllables.

Standard Gemmerian

This dialect is known for its smooth and flowing pronunciation, with a particular emphasis on the "zh" sound. Gemmerian speech lacks the harshness or clipped consonants found in Aedirnian and emphasizes a more fluid delivery. Words containing the "zh" sound are accentuated, creating a distinct aural quality.

Standard Ebbinger

In the standard Ebbinger accent, speakers frequently weaken or even omit final consonants, especially stops like "p," "t," and "k" at the end of words or syllables. Additionally, these speakers typically demonstrate more open vowels, particularly in unstressed syllables. This characteristic imparts a more relaxed and sonorous quality to their speech, contributing to a pleasant and distinctive overall character.

Mahakiam

The Mahakiam accent is marked by hard, guttural sounds and distinct consonant clusters. The pronunciation is robust and carries a weighty, impactful quality. Vowels are often nasalized, adding a unique flavor to the speech.

Standard Metinnese

The Metinnese accent features a rhythmic and sharp pronunciation, with a tendency to roll the "r" sound. Consonants are enunciated with precision, creating a distinct and expressive cadence. The accent is characterized by its melodic flow and clear articulation.

Novigradian

The Novigradian accent is a melting pot of linguistic influences due to the city's cosmopolitan nature as a trade hub. It is a blend of various Northern Realms influences, primarily from Redania, Temeria, Cidaris, and Kovir. The Redanian influence is discernible in the Novigradian accent's treatment of certain consonants, particularly the distinct pronunciation of "w" as "v" and the characteristic shift of "ch" to a more "j"-like sound.

From Temeria, Novigrad borrows a certain straightforwardness and clarity in speech. Consonants are pronounced with precision, and the overall intonation maintains a balanced and pragmatic quality. Cidaris contributes to the Novigradian accent through its impact on vocabulary and idiomatic expressions. Lastly, the Kovirian accent contributes to the Novigradian accent with the cadence and melodic tone characteristic of Kovirian speech finding echoes in Novigradian intonation. Novigradians adopt the Kovirian tendency to soften final consonants, contributing to the smooth and flowing quality of their accent.

Standard Nazairan

The standard Nazairan accent is characterized by nasalized vowels and a melodic intonation. Consonants are pronounced with a moderate pace, and the overall speech has a distinct musical quality. The accent carries an air of elegance and fluidity.

Standard Lyrian

The standard Lyrian accent is very similar to the Rivian accent due to their shared history. The most significant difference lies in the affricates "ch" (ce) and "g" (ge) sounds in standard Rivian. The standard Lyrian accent replaces these with fricatives like "sh" and "zh." Additionally, there are slight variations in vowel sounds, with Lyrian having a more "closed" pronunciation for the final "a" sound in some words compared to standard Rivian.

Standard Redanian

The Redanian standard accent in Common Speech is characterized by some distinctive phonetic features. For instance, the "w" is pronounced similarly to "v," and the "ch" sounds closer to "j." Additionally, in the Redanian accent, open vowels tend to close, and there is a tendency to aspirate the "s" at the end of syllables.

Standard Rivian

The Standard Rivian accent shares similarities with the Standard Lyrian accent due to their geographical proximity and historical ties. However, some key differences exist. Standard Rivian retains the affricates "ch" and "dz" sounds, absent in the Lyrian accent which replaces them with fricatives like "sh" and "zh." Additionally, Rivian vowels tend to be more centralized, with a less pronounced distinction between open and closed vowels compared to Standard Lyrian.

Standard Skelliger

The standard Skelliger accent is characterized by a rugged and hearty pronunciation. Consonants are pronounced with strength and vigor, and there is a tendency to truncate certain syllables.

Kerackian

The Kerackian accent, while sharing some vowel emphasis with its Cidarian neighbor, retains a distinct character. Kerackian speakers pronounce consonants with more force compared to Standard Cidarian, resulting in a less flowing and slightly harsh sound. The presence of palatalization and a uvular trill for the "r" further differentiate it from other Common Speech dialects.

Standard Kovirian

The standard Kovirian accent of Common Speech is distinguished by the following phonetic differences. The prevalence of "seseo," particularly along the coastal areas, adds a distinct feature to the dialect. Pronouncing the letter 'x' as 'sih' significantly contributes to the accent's uniqueness, transforming words like "xico" into "sihko." Additionally, the use of "voseo" instead of the pronoun "ti" imparts an informal and close nuance to communication, possibly stemming from the preservation of the formal equivalent pronoun for "ti" used in Proto-Common.

The unique pronunciation of the letter 'j' as 'sh,' as seen in "Jolanta" becoming "sholanta," along with phenomena like yeísmo, adds another layer of phonetic complexity. This accent is also characterized by a deliberate rhythm in intonation, giving the language a cadence and melodic tone. The tendency to soften some final consonants contributes to the fluency and smoothness of speech, lending an air of elegance that often arouses envy from other kingdoms, notably Redania.

In affirmative expressions, the Kovirian accent tends to exhibit a firmer and more decisive intonation, reinforcing clarity in communication. The careful pronunciation of vowels, with a tendency to slightly lengthen them, is also characteristic of this accent.

Regarding interrogatives, the Kovirian accent stands out for its distinctive intonation at the end of sentences, where tonal elevation adds an unmistakable touch to questions.

Grammatically, the Kovirian accent also presents notable peculiarities. The frequent use of conditional constructions, such as employing the subjunctive in hypothetical situations, adds a unique grammatical complexity to discourse. Additionally, the preference for archaic forms of some verbs (likely retained since their independence) conjugated differently from contemporary norms, adds a touch of linguistic tradition to oral expression.

Regarding vocabulary, the Kovirian accent is enriched with terms and idiomatic expressions specific to the region, some of which may be perplexing for speakers of other dialects of Common Speech as they derive mostly from trade pidgins or isolated evolutions of the Common Speech used during the time Kovir gained independence from Redania.

Temerian

The Temerian accent is recognized for its clear and concise pronunciation, with minimal regional variations, making it often regarded as the closest to the "ideal" Common Speech. Each syllable is pronounced distinctly, and speech patterns are relatively flat and even, featuring minimal pitch variation. Given Temeria's central location, the dialect has incorporated some vocabulary and expressions from neighboring regions, but these influences are subtle and seamlessly integrated into the standard dialect.

Standard Toussaintoi

The Toussaintoi accent is known for its sing-song quality. Sentences rise and fall melodically, often ending with a slight flourish, lending a playful and carefree air to speech. Toussaintois favor open vowels, particularly "a," "e," and "o," which are pronounced with a wider mouth opening compared to the standard Common Speech. This creates a more rounded and pleasant sound. The pronunciation of consonants is softer and less emphasized than in standard Common Speech. For instance, the "r" sound becomes a gentle trill, and the "t" at the end of words is often softened or elided altogether.

Regarding vocabulary and expressions, Toussaintois pepper their speech with derive words from Elder Speech and Nilfgaardian, particularly those related to art, culture, and etiquette. They are known for their flowery language and fondness for diminutives. They readily use expressions of endearment and politeness, even when addressing strangers.

Accents Examples			
Pronunciation	Variation	Example	Notes
Standard Aedirnian	Harsh, clipped consonants, shortened vowels	É um **tremba** pro Vesemir!	Emphasis on consonants

Standard Cidarian	Lyrical, emphasis on vowels, softened consonants	É é um **treabaa** pro Vesemir!	Elongated vowels for a sing-song effect
Standard Ebbinger	Open vowels, weakened final consonants	É um **treaba** pro Vesemi!**	Weakened final "r"
Standard Gemmerian	Smooth and flowing, emphasis on "zh" sounds	É um **trebā** pro Vesemir!	Smooth pronunciation with emphasis on fricatives
Kerackian	Harsher, strong consonants, vowel emphasis	É **um** tre**ba** pro Vesemir'!	Emphasis on final "r," possible uvular trill
Mahakamian	Hard, guttural sounds, distinct consonant clusters	É **um** tre**bah** pro Vesemir!	Pronunciation influenced by Dwarven language with strong, guttural sounds
Standard Kovirian	Softer consonants, vowel emphasis, rhythmic	É **um** tre**ba** pro **Veshemir**!	"Vesemir" pronounced with "sh" due to yeísmo
Standard Lyrian	Similar to Rivian, fricatives "sh" & "zh"	É **yn** tre**ba** pro Vesemir!	"yn" replacing "um" as a dialectal variation for "a/an"
Standard Metinnese	Rhythmic, sharp consonants, rolling "r"	É um **treba** pro Vesemir!	Sharp consonants and rolling "r" with a rhythmic flow

Standard Nazairan	Nasalized vowels, melodic intonation	É um **treba** pro Vesemir!	Nasalized vowels and melodic intonation
Novigradian	Blend of influences, clear pronunciation	É **um** tre**ba** pro Vesemir!	Influenced by Temeria's clear pronunciation
Skelliger	Rolling "r," nasalized vowels	É um **trebara** pro Vesemir!	With longer, rolling "r" and nasalized vowels
Standard Redanian	"w" as "v", "ch" closer to "j", closed vowels	É **um** tre**ba** pro Vesemirí!	Aspirated final "r"
Standard Rivian	Similar to Lyrian, retains affricates "ch" & "dz"	É **yn** tre**ba** pro Vesemir!	"yn" replacing "um"
Standard Toussaintoi	Sing-song intonation, open vowels, softer consonants	É **um** tre**baa** pro **Vesemir**!	More pronounced rise and fall in pitch
Temerian	Clear, concise pronunciation	É **um** tre**ba** pro Vesemir!	Minimal regional variations, considered close to "ideal" Common Speech

Sample Text

Below is the speech of Alzur presented in multiple languages, showcasing its translation and adaptation into Nordlingaen, alongside other major languages for comparative purposes.

Language	Text
English (original)	<p>Your Most Serene Majesty,</p> <p>We find ourselves in a world turned most foul.</p> <p>A world filled with innumerable horrors, monstrosities...</p> <p>That prey on the meek and mighty alike.</p> <p>'Tis truly a wretched scourge born of nightmares!</p> <p>Yet it need not be so!</p> <p>Freed of the fetters of the spineless Council,</p> <p>we can create something new.</p> <p>Hunters of exceptional strength, speed, agility,</p> <p>equipped to overcome absolutely any foe.</p> <p>Bards will toil to do justice to their feats,</p> <p>for sometimes one needs a monster to slay a monster.</p>
Spanish	<p>Su Serenísima Majestad,</p> <p>Vivimos en un mundo de lo más infame.</p> <p>Repleto de innumerables horrores y monstruosidades que acechan a humildes y poderosos por igual.</p> <p>¡Una desdichada plaga nacida de pesadillas!</p> <p>¡Pero no tiene porque ser así!</p> <p>Sí nos libramos del yugo del pusilánime Consejo,</p> <p>podemos crear algo nuevo.</p> <p>Cazadores con una fuerza, velocidad y agilidad excepcionales, equipados para superar a cualquier enemigo.</p> <p>Los bardos harán justicia de sus hazañas, pues a veces hace falta un monstruo para matar a otro monstruo.</p>

Latin

Sua Serenissima Maiestas,
Vivimus in mundo infamissimo,
Referto innumeris horroribus et monstris quae et humiles
et potentes pariter insidiantur.
Pestis miserrima ex somniis orta!
Sed non necesse est ita manere.
Si iugo pusillanimi Consilii liberemur, aliquid novum
creare possumus:
venatores fortitudine, velocitate, agilitate eximia praediti,
parati ut quemlibet hostem superent.
Bardi facta eorum celebrabunt; nam aliquando monstrum
necesse est ad aliud monstrum vincendum.

Nordlingaen

Ti Paci't Bæhé,
Nós gwidai en um nátaalam ze le maien malik.
Satur ze inmunt ekek y monstrumi thar lurthan le subte y
michte pro alik.
¡Jesé mish pesti genai ze noč'morai!
¡Sidi nōn hala na jesa sē!
Jakeñ nós zafran zo júgom zo kowarte Consilo, nós kan
kriar kar novi.
Venatori sēm ona força, swifta, agilita notaviki,
equipati pro vinkar enê enemic.
Troveri halaran justa ze seu maegeni,
pro algután hala um monstrum na kurrar altri monstrum.

Votre Très Sérénissime Majesté,
Nous vivons dans un monde devenu des plus infâmes.
Un monde rempli d'innombrables horreurs et
monstruosités...

French

Qui s'attaquent aussi bien aux humbles qu'aux puissants.
C'est véritablement une peste misérable née des cauchemars!
Mais cela ne doit pas être ainsi!
Libérés des chaînes du Conseil lâche,
nous pouvons créer quelque chose de nouveau.
Des chasseurs dotés d'une force, d'une vitesse et d'une agilité exceptionnelles,
équipés pour vaincre absolument tout ennemi.
Les bardes se donneront du mal pour faire justice à leurs exploits,
car parfois, il faut un monstre pour tuer un autre monstre.

German

Eure Durchlauchtigste Majestät,
Wir leben in einer Welt, die äußerst niederträchtig geworden ist.
Eine Welt voller unzähliger Schrecken und Monstrositäten...
Die sowohl die Schwachen als auch die Mächtigen gleichermaßen heimsuchen.
Es ist wahrlich eine elende Plage, geboren aus Albträumen!
Doch so muss es nicht bleiben!
Befreit von den Fesseln des feigen Rates,
können wir etwas Neues schaffen.
Jäger mit außergewöhnlicher Stärke, Schnelligkeit und Geschicklichkeit,
ausgestattet, um jeden Feind zu überwinden.
Die Barden werden sich bemühen, ihren Taten

Gerechtigkeit widerfahren zu lassen,
denn manchmal braucht es ein Monster, um ein anderes
Monster zu töten.
